

25X1A [REDACTED]

25X1A

Called by [REDACTED] OST (13 Jan 72, 1545) regarding  
two questions he would like answers to:

1. What was nadir or best resolution of the KH-4 as of 1962?
2. Would like the statistics of the weather of the people's Republic of China, probably on a monthly basis; presume statistics will vary as to the part of China in question (north or south) and weather statistics should be presented in subdivisions of the country.
